RE: Form 481 – Carrier Annual Reporting Data Collection, 2014
WC Dockets No. 14-58, 10-90, and 11-42

Dear Ms. Dortch:

Pursuant to §0.457 and §0.459 of the Commission's rules, MoKan Dial Telephone Company ("the Company"), by its attorneys, hereby requests that certain materials and information be withheld from public inspection. Specifically, the Company requests confidential treatment of the Five Year Service Quality Improvement Plan (the "Plan" or "confidential information") attached to its Form 481 filing.

In support of its request for confidential treatment and pursuant to the requirements under § 0.459(b) of the Commission's rules, the Company states the following:

1. Identification of the specific information for which confidential treatment is sought.

The Company seeks confidential treatment of the Five Year Service Quality Improvement Plan, attachment 411807KS112 to the Form 481 filing accompanying this letter, which contains sensitive financial information about the Company as well as information about the Company's projected network improvements and upgrades for voice and broadband services during the period from 2015 through 2019.

2. *Identification of the Commission proceeding in which the information was submitted or description of the circumstances giving rise to the submission.*

The documents are being submitted as part of the annual Eligible Telecommunications Carrier Report (Form 481) mandated by section 54.313 of the Commission's rules.

3. *Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged.*

The data described is highly confidential and sensitive commercial and financial information which constitutes trade secrets or sensitive commercial and financial information that "would customarily be guarded from competitors,"¹ and is therefore exempted from mandatory disclosure under FOIA Exemption 4 and Section 0.457(d) of the Commission's rules.²

4. *Explanation of the degree to which the information concerns a service that is subject to competition.*

The Plan relates to voice and broadband services provided by the Company that are subject to competition from competitive local exchange carriers, cable television system operators, electric power utilities, fixed and mobile wireless service providers, and/or satellite carriers.

5. *Explanation of how disclosure of the information could result in substantial competitive harm.*

Disclosure of the confidential information is likely to result in substantial competitive harm to the Company because the confidential information could provide competitors with commercially sensitive insights related to the Company's operations, service offerings, and costs.

6. *Identification of any measures taken by the submitting party to prevent unauthorized disclosure.*

The Company does not make the Five Year Service Quality Improvement Plan or any of the information contained therein publically available in any way, and further limits internal access to key employees subject to strict non-disclosure obligations.

7. *Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties.*

The Company does not make the confidential information available to the public and it has not previously allowed disclosure of the confidential information to third parties that are not otherwise bound by confidentiality obligations.

¹ *Id.* § 0.457(d)(2).

² 5 U.S.C. § 552(b)(4); 47 C.F.R. § 0.457(d).

8. *Justification of the period during which the submitting party asserts that the material should not be available for public disclosure.*

The confidential information should be treated as confidential for an indefinite period, as the Company will always be subject to competition and the competitive harms associated with the disclosure of the confidential information.

In order to provide adequate protection from public disclosure, the Commission should strictly limit distribution of the confidential information within the Commission on a "need to know" basis and not allow any distribution outside of the Commission. In the event that any person or entity outside the Commission requests disclosure of the confidential information, the Company requests that it be so notified immediately so that it can oppose such request or take other action to safeguard its interests as it deems necessary.

Please direct any questions regarding this submission to the undersigned.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read 'Salvatore Taillefer, Jr.', is positioned above the printed name.

Line 610: Functionality in Emergency Situations

MoKan Dial, Inc. ("MoKan" or "the Company") has an Emergency Operations Plan ("EOP" or "the Plan") that addresses the requirements for continuity of service and systematic restoration of service after loss of service due to an emergency. The EOP is administered and maintained by a member of senior management of the parent company, Townes Telecommunications, Inc., and is reviewed annually to ensure that each applicable section is accurate and any changes or updates to the Plan are made on a timely basis.

An Emergency Director has been authorized to implement the provisions of the EOP. The Emergency Director conducts training with employees and is responsible for ensuring that all new employees are provided a 30 minute overview of the Plan as part of their orientation. Specific supervisory personnel receive additional intense instructions regarding special areas of the Plan.

The Plan established an Emergency Committee made up of senior management and key company personnel, who upon notification by the Emergency Director that a potential emergency exists, convene to declare an emergency, notify affected parties and assume control of restoration of service efforts.

An emergency control center is established at the Company's business office, which is equipped with a back-up power generator and a wireless telephone set. Depending upon the severity and type of emergency and the safety of the emergency location, a control center may be established at the site of the event.

In case of power outages, batteries in the central office will last on average from 4-8 hours depending on how many lines (AMP load) are served at that particular location. The stand-by generator has 24 hour diesel capacity and small generators are available to be put on smaller concentrators if power is lost. The small generators have to be refueled every few hours.
